Codea Freight Management System

FR8

We offer an accurate
FREIGHT MANAGEMENT SYSTEM
with built-in redundancies.

The ease of logistics operations greatly depend on a viable solution that can manage the flow to take the right product to the right customer within the specified time. Codea Logistics software integrates complex logistics processes into a simplified system to manage the way materials, goods, freight, sales orders, inventory, and production are handled.

A more refined and faster system for freight forwarders, NVOCCs, forwarding agents, supply chain providers, couriers, manufacturers and warehouse providers, to effortlessly manage products, warehouses, shipment, fleets, and drivers.

The complete and accurate logistics management system creates an effective ecosystem for all stakeholders.

This intuitive system, fully-integrated with a flawless accounting system, handles several functions in the logistic operations such as production planning, sourcing, procurement, packaging, and dispatching.

FREIGHT FORWARDING   **WAREHOUSE MANAGEMENT**   **FTZ MANAGEMENT**   **DISPATCH MANAGEMENT**

WAREHOUSE MANAGEMENT

The software has an all-inclusive module for managing warehouse operations end-to-end facilitating accurate freight and warehouse management system with built-in redundancies.

The system matching requirements of warehouse operating entities is a fully scalable system gives you maximum visibility and control over inventory with real-time tracking facility. The warehouse management system handles the linear flow of raw materials from suppliers into a warehouse and then a production unit. Barcode scanning, shipment and order management, notifications and alerts, bill of lading etc are areas covered in the system. It has the facility to generate waybills, bill of lading and information both statutory and non-statutory in pre-defined formats. A well-organized system for supply chain providers, manufacturers, and carriers etc. to manage warehousing operation comprehensively with simple workflows.

- **Scalable warehouse management software**
- **Inventory Visibility**
- **Order Management**
- **Event Notification**
- **Multi-warehouse**
- **Barcode scanning**
